Other information 11

Thanks again for choosing BT.

What’s in the box

Ultrafast Smart Hub
Broadband cable (grey ends)
Ultrafast filter (black)
Power cable and plug (in two parts)

Ultrafast Smart Hub user guide
Extra sticker with Hub details to put somewhere handy
Ethernet cable (yellow ends) for a wired connection
Bag for returning your old Hub

Got a bundle, like a BT Mini Hub or BT TV, too?
Set up your Smart Hub first before setting up anything else.
Get to know your Ultrafast Smart Hub

**Front**

Hub status light
Have a look at page 9 to see what your Hub lights mean

**Back**

Hub wireless settings
A handy removable card with all you need, including passwords, to connect wirelessly

- **Connect to your Hub’s Wireless**
  - Select your Wireless Network: BT-WWWWW
  - Enter your Wireless Password/key: 8888WWWW

- **Admin Password for Hub Manager**: 8888WWWW

- **Power On | Off**
  - **Power socket**
  - **Power button**

- **USB port** (not in use)
- **Gig Ethernet**
  - Four Gig Ethernet ports
  - To connect devices using a cable

- **Phone port** (not in use)

- **Broadband port**

- **WPS button and light**
  - Use this as a quick way to connect wireless devices. See page 5

- **Factory Reset button**
  - See page 9

How to set up and get connected

1. **Unplug your old Hub, filter and cables**
   When you've got our email or text saying your broadband is ready, you can unplug your old kit – and put it aside. That's your old Hub's power plug, its broadband cable and any attached filter. You'll need to use the new bits we've sent you in the box.

2. **Connect your Hub to the master phone socket**
   - **If you've got an engineer coming to set things up for you:**
     You don't need to do anything. They'll replace your phone socket with a new one like this. After the engineer's been, follow steps 6 to 8.
   - **If you're setting things up yourself:**
     Using the broadband cable, connect your Hub to the master phone socket. Depending on the socket type, you might need your new black Ultrafast filter.
     - Double socket: no filter needed
     - Single socket: use black Ultrafast filter

3. **Plug in the power**
   Slide the two parts of the Hub's power plug together until they click into place. Connect the power cable to your Hub, plug it in at the wall and switch the socket on.
   - **After a few minutes, a blue light will show your Hub is ready.**
   - **You don't need an Openreach modem, so don't plug it in.**

4. **Press the Power button**
   It's on the back of the Hub. The light on the front will change colour while your Hub sets itself up. This takes a few minutes.
**Your Hub is ready**

You’re online when its light is blue. If it isn’t blue, see page 8 for help with connecting.

After a few minutes, a blue light will show your Hub is ready.

**Connect to wireless**

You’ll need your Hub’s wireless network name and password. They’re on the back of your Hub.

Your Hub will be called something like BT-WWWW. If your device supports WPS, press the WPS button on your Hub – it’s a quick way to connect.

For tips on how to get the best wi-fi signal in your home, go to bt.com/yourwi-fi

**Finish setting up online with Smart Setup**

Whenever you connect a device to the Hub for the first time, your web browser will ask you if you want to activate any of your BT Extras, including BT Parental Controls.

**How to turn off Smart Setup**

Follow the steps at bt.com/help/smartswitchoff

**Help us reduce waste**

Please use the box your new Hub came in to return your old Hub for recycling (there’s more detail on the back of the box).

**Prefer a wired connection?** Use your Ethernet cable (yellow ends) to connect your device to any of the yellow Ethernet ports on the back of your Hub.

**All done.**

Get more with My BT

Go to bt.com/mybt or download the My BT app to manage your account and products, online security and BT Extras. So everything’s in one place.

Go to bt.com/mybt to:

✓ track an order
✓ view your bills and manage payments
✓ check your calls and broadband usage
✓ see your inclusive BT Extras (see page 7)
✓ upgrade your calls, broadband and TV packages
✓ get help with your BT services.

Download the My BT app

Go to bt.com/mybtapp/download

Or if you’ve got an Apple® or Android® smartphone, text ‘My BT’ to 81192 and we’ll send you a link to download it.

If you need some help, see page 11.

6 Welcome to BT Broadband
Get ready with your BT Extras

You can find them in My Extras at bt.com/getready

**BT Sport**
Watch unmissable action from the Barclays Premier League, UEFA Champions League, The Emirates FA Cup, Aviva Premiership Rugby, European Rugby Champions and Challenge Cups, MotoGP™ and much more.

**BT Wi-fi**
Get unlimited access to the UK’s largest network of wi-fi hotspots. Connect using a browser on your laptop or download our app.

**BT Cloud**
Securely back up your precious photos and important files any time, on the go, using any device.

**BT Email**
Get up to 11 email addresses, unlimited storage and protection against viruses and spam.

**BT Parental Controls**
Help to keep your family safe online by filtering inappropriate content.

**BT Virus Protect**
Download it on your device so you’re protected when browsing online – against viruses, scams, spyware, phishing attacks and other internet threats. It also protects you from infections from other things (like USB memory sticks), even when offline.

**BT Web Protect**
Protect your gadgets against infection from viruses, scams and phishing attacks by warning you if you’re going to a website that might be harmful. It works on any device connected to your BT Broadband or BT Wi-fi. You don’t have to install anything. Just turn on BT Web Protect online.

Troubleshooting

If your Hub is showing an orange light, it’s running okay but needs a bit of help connecting to the internet.

Here’s what to do
1. Connect a device to the Hub using wireless or an Ethernet cable.
2. Open a new web browser on your device.
3. Follow the on-screen help wizard to get connected.
## What your Hub lights mean

<table>
<thead>
<tr>
<th>Lights</th>
<th>What’s happening</th>
<th>What to do</th>
</tr>
</thead>
<tbody>
<tr>
<td>No light</td>
<td>The power is off or you’ve turned the lights off</td>
<td>If you haven’t turned the lights off, check that the Hub’s Power button is on, its power cable is plugged in correctly at the mains and power is turned on. If there’s still no light, call us on 0800 111 4567. We’re usually less busy between 12pm and 6.30pm.</td>
</tr>
<tr>
<td>Green light</td>
<td>The Hub is starting up</td>
<td>Wait a couple of minutes for it to start</td>
</tr>
<tr>
<td>Flashing orange light</td>
<td>The Hub is connecting to broadband</td>
<td>Give it a minute or two to connect. The light will turn blue when your Hub is ready</td>
</tr>
<tr>
<td>Flashing purple light</td>
<td>The Hub is working but the broadband cable isn’t connected</td>
<td>Check the broadband cable (black, with grey ends) is plugged in correctly and you’re using the black Ultrafast filter that came with your Hub. You can see which cable goes where on page 4. If setting up for the first time, it could take until midnight for your broadband to start</td>
</tr>
<tr>
<td>Steady orange light</td>
<td>The Hub is working but isn’t connected to the internet</td>
<td>Connect a device to your Hub using a cable or wi-fi. Open a new web browser window and follow the on-screen help wizard to get connected</td>
</tr>
<tr>
<td>Red light</td>
<td>There’s a problem somewhere</td>
<td>Using the Power button, turn your Hub off and on again. If the light still doesn’t turn blue, use a paper clip to press your Hub’s Factory Reset button. If this doesn’t fix it, call us on 0800 111 4567. We’re usually less busy between 12pm and 6.30pm. Make sure you’re next to your Hub with a computer or device if you call</td>
</tr>
<tr>
<td>Blue light</td>
<td>The Hub is working fine</td>
<td>If you can’t get online, there might be a problem with your computer, tablet or mobile device. Turn it off and then on and try again. If you’ve still got a problem, get some help from the manufacturer or supplier</td>
</tr>
<tr>
<td>WPS button and light</td>
<td></td>
<td>If it’s flashing blue, it’s waiting for you to press the WPS button on your computer or device (you’ve got two minutes). If it’s flashing red, it didn’t connect – give it a couple of minutes and try again. No light means that it’s connected successfully</td>
</tr>
</tbody>
</table>

Hub Manager

Use your Hub Manager to get the best from wi-fi and manage settings.

You can:
✓ switch on BT Access Control
✓ fix problems using wizards
✓ see your broadband performance
✓ see all your connected devices.

How to open your Hub Manager
1 Open a new web browser on your device.
2 Type 192.168.1.254 into the address bar.
3 If you want to make any changes, you'll need your Admin password. It's on the Hub's settings card on the back of your Hub.
Need some help?

Choose the way that suits you.

Go to bt.com/help
It’s the quickest and easiest way to get help, all day, every day.

Chat to us at bt.com/chat
We’re here to help seven days a week between 7am and 11pm.

Call us
If you need to talk, give us a ring on 0800 111 4567. We’re usually less busy between 12pm and 6.30pm. Make sure you’re next to your Hub with a computer or device if you call.

You can also call 0330 123 4567 from a mobile. All numbers starting 0330 are charged at a national rate and are included in any free minutes as part of your mobile contract. Some mobile operators allow free use of 0800 numbers.
